

Fall

Fall in Pittsburgh is magical, and there's no better place to experience the season's magic than the city's parks. Strolling through the crisp air and bright, colorful leaves will warm you up inside, even as the weather outside continues to cool. Head to your park to experience these changing colors and new, open views as the leaves of spring and summer finally fall.

MATCH Leaves

When leaves fall down you can see them up close. Can you match them to the tree they came from? (this gets trickier as more leaves fall.)

PILE Leaves

If it's late enough in the season, you'll find more than a few leaves on the ground. Pile them up and jump on top!

Find a Fall FESTIVAL

Fall is a great time for outdoor events: not too hot or too cold, just right for fantastic events (like Bump in the Night!)

JOG through the park

The cool fall weather is great for a brisk jog. There are tons of trails to choose from. Find one near you and get moving!

Create a CREATURE

Use some of the items that fall to the ground this time of year and make a fun creature out of them!

Collect NATURE

If you don't feel like crafting, you can just collect little bits of nature and make your very own park museum!
