Coffee Filter Spider Web Craft

Follow these simple instructions to make your own spider webs out of a common household item, coffee filters! If you don't have any, you can swap it out for any other type of paper. You can even cut out a spider to live on the web.

Spider Web Tape Game

Turn your living room into a giant spider web to navigate through! Using a roll of tape, create a spider web on the floor and follow the instructions for variations of games to play on it. Challenge yourself to stay on the tape lines and collect bugs that get caught in your web.
