

# Caddisfly Larva Craft

## Supplies:

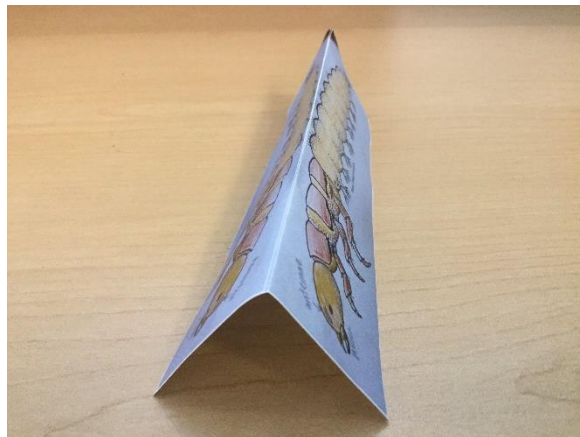

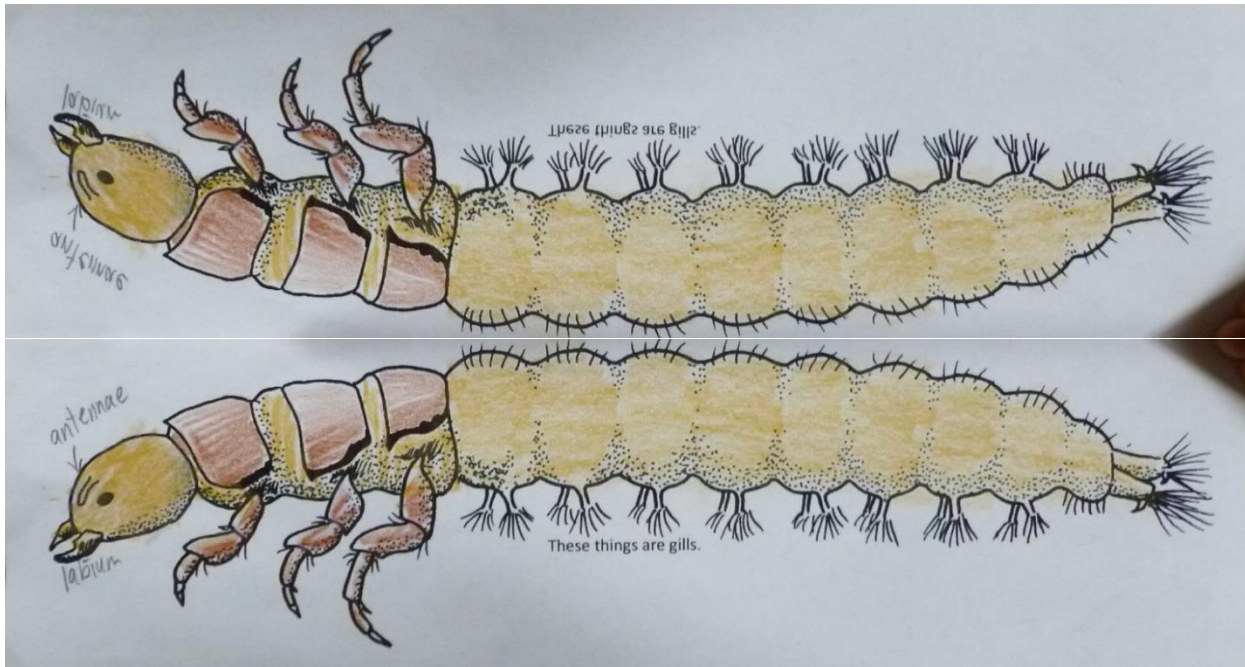

- Cardboard toilet paper roll
- Scissors
- Glue or Glue Stick
- Markers or Picture of Rocks (rock picture included below)
- Caddisfly Larva picture (included below)

Note: when printing these pages, print each page separately/one-sided.

## Instructions:

To make the caddisfly larva body:

1. Cut out the caddisfly larva picture below in one rectangular piece. Once you've cut it out, fold it on the center line, so that both sides show the larva (see image below.) Feel free to add more color to the larva with your markers!

## To Make the Caddisfly Larva Case:

1. Option #1: Cut out the picture of the rocks. Glue the paper rocks around the toilet paper roll to make a rock caddisfly larva case.
2. Option #2: Use markers and your own imagination to decorate the toilet paper roll any way you like. Be creative and make your own artistic case!

*Cardboard roll with  
rock picture glued on.*

3. Once you've finished decorating your case, put your caddisfly larva into the tube case. Now that it is safe, take it for a walk and enjoy!
