

Real data, authentic learning

Get paid to create lessons through the Frick Environmental Center Educator Cohort!

High school educators are invited to create sustainability lessons using the Frick Environmental Center Building Dashboard.

Participants will receive in-depth training on the building dashboard, a \$250 stipend, and a building tour for their class! Sign up today for our February and April cohort dates.

The Details:

- This cohort is targeted for science and math educators, but all educators are welcome to apply
- Participants must work with high school students in an organized setting (classroom, outdoor, OST)
- Participants must attend two 1.5 hour meetings (virtual or in person) and produce at least two lessons based on the building dashboard data
